SUMMARY

Full Stack Developer and AI/GenAI Engineer with 1.5+ years of experience building scalable web applications and AI-driven solutions. Specialized in LLM integration, RAG pipelines, and prompt engineering for production AI features. Proven track record of reducing hiring time by 70%, boosting user engagement by 40%, and achieving 99.9% API uptime. Experienced in full lifecycle ownership — from system architecture and API design to containerized cloud deployment on AWS EC2 with Docker and GitHub Actions CI/CD.

SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Backend & Databases: Python (Flask, FastAPI), Go (Fiber), REST APIs, PostgreSQL, MySQL, Redis

AI / GenAI: Google Gemini AI (Vision, Live API), OpenAI GPT-4o Realtime, RAG, Prompt Engineering, NLP, Sentence Transformers

Cloud & DevOps: AWS EC2, S3, SES, RDS, Docker, Docker Compose, Nginx, GitHub Actions CI/CD, Cloudflare

Monitoring & Queuing: Prometheus, Grafana, Sentry, RabbitMQ

Other: Flutter (Android/iOS), WebSocket, Firebase Auth, Razorpay, Git, Linux, Postman, Agile/Scrum

EXPERIENCE

AI Software Developer

Jun 2026 – Present

CareCaller – AI Voice Companion App | Self-Initiated

- Architected a production voice platform on AWS EC2 with Cloudflare edge (DDoS, WAF, WebSocket), Nginx reverse proxy with rate limiting, and a Docker Compose dual-service backend (Go Fiber relay + FastAPI).
- Engineered a low-latency voice pipeline achieving realistic TTFT of ~433ms and best-case ~309ms by eliminating DB/Redis reads on the hot path and dispatching tool calls in parallel goroutines.
- Integrated Gemini 2.5 Flash (Vertex AI) with native-audio-dialog mode and server-side VAD; implemented on-device AEC, barge-in VAD, and auto-reconnect logic across 6 AI voice companions.
- Built a full observability stack (Prometheus, Grafana, Sentry) and integrated Razorpay with HMAC-SHA256 webhook verification and Redis-backed per-minute credit billing.

Full Stack Developer

Jan 2025 – Jun 2026

Alhat Holdings | Remote

Reclaim – Shopping Platform

- Integrated Google Gemini Vision API to automate product attribute extraction via multi-image analysis and OCR fusion; implemented a confidence-scoring pipeline that reduced manual data-entry effort by 60% across 900+ e-commerce domains.
- Developed full-stack e-commerce platform with 100+ Flask REST APIs and React.js frontend, implementing microservices architecture across 6 independently deployable services.
- Built Chrome Extension (Manifest V3) with multi-layer scraping engine supporting 900+ domains using JSON-LD, Microdata, and DOM parsing.
- Deployed production infrastructure on AWS EC2 using Docker Compose and Nginx reverse proxy; maintained 99.9% uptime and sub-100ms API routing overhead via container health checks.

PROJECTS

ScrapeMind AI — FastAPI, Gemini AI, MySQL, Redis, RabbitMQ, Prometheus, Docker

- Built an enterprise Chrome Extension with Gemini LLM integration achieving 85%+ extraction confidence across 500+ e-commerce platforms; architected async job processing via RabbitMQ with dead-letter exchange and retry policies.

HireLens AI — AI-Powered Recruitment Platform

- Built an end-to-end AI recruitment platform using Gemini AI for resume parsing, candidate scoring, and dynamic interview question generation with 95%+ accuracy, reducing hiring pipeline time by 70%.

EDUCATION

Master of Computer Applications (MCA)

Aug 2023 – Jun 2025

Pimpri Chinchwad University, Pune, Maharashtra | CGPA: 7.9

Bachelor of Computer Science (BCS)

Jun 2020 – May 2023

Ramkrishna More College, Pune, Maharashtra | CGPA: 7.5

CERTIFICATIONS

- Anthropic Claude and Model Context Protocol (MCP) Certification (2025)
- Master Course in Cloud Computing and Cloud Architecture 2.0 — Udemy, Dr. José Prabhu J (2026)
- Master Course in Artificial Intelligence & Deep Learning 3.0 — Udemy, Dr. José Prabhu J (2026)
- Google Generative AI Learning Path — Google Cloud Skills Boost (2024)
